

You DONT have to print out this puzzle to do it, but it is easier if you can circle them.

"A story about being different"

Look at the first picture of octopus #1. There are at least 8 differences in the other octopi. Can you find them.  
(Hint: Some have more than one difference.)

#1

Circle the differences. How many did you find? Did you find a lot? if so ... You got great eyeballs!
