

Drawing From Numbers 2

Follow the steps below to draw something from a number. The number 2. On each step I am using red to show you what to do next. You can draw it all in one color if you want! Continue adding to your original drawing. Don't make all these drawings separate.

Step 1
Draw the number 2.

Step 2
Draw a shape like a C from the top point on the 2.

Step 3
Make a backwards S shape from the bottom of the C shape you just made. Make the shape below on the right side that connects to the bottom of the 2.

Step 4
Make a sideways V shape to make a bill. Then put a dot for the eye.
(See the number 2? it's still there!)

Step 5
Now add a wing and the water. And wow, you have a swan or goose.
(which do you think it looks like?)

Step 6
This is what your final drawing should look like. You can add a whole scene and then color it if you like.
