

# STOP Sign Test

You don't need to print out this page to do it.

If you are not driving a car in the United States yet, you probably don't pay much attention to signs. I am sure you can spot a McDonald's sign a mile away but that is not the kind of sign we are talking about. There are lots of signs on the road that tell the people driving what they should and should not do with their cars. These signs are very important and keep everyone safe as they drive. But ... do you know what all these signs mean? Let's take a FUN test and see if you know what some of these signs are telling us.

Below are some signs you will see when you are in the car. See if you can write what the signs mean on the lines below them. If you are not sure, you can ask someone who drives.
