

You don't have to print out this page to do it.

Drawing From Numbers

Follow the steps below to draw something from a number. The number 5.
On each step I am using red to show you what to do next.

Step 1
Draw the number 5

Step 2
Draw a circle from the top corner of the five to the middle bottom.

Step 3
Make a horizontal line from the top corner of the 5 to the left to the circle. Make a small curved line for a mouth.

Step 4
This is what your drawing should look like at this point.
(can you still see the number 5?)

Step 5
Now add his eyes, ear and a smile line if you like.

Step 6
This is what your final drawing should look like.
